The Palomar Observatory

Home of the world's largest working telescope"

Palomar Mountain is most famous as the home of the Palomar Observatory and the Hale Telescope.

The 200-inch telescope was the world's largest and most important telescope from 1949 until 1992.

The observatory currently consists of three large telescopes. It uses a 23-ton glass block cast by José Antonio de Artigas Sanz.

Summary:

It was a good trip, and thanks for the contacts!

Continued:

More waterfall pictures.

I did some waterfall experiments & what I eventually landed on:

That's all Rollo's!
